## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 17-36 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or teach a first path, a second path and a third path and an intersection, all with armature windings disposed therein in combination with the other features of claim 1. The prior art of record does not disclose or teach a method for routing a stage along a path with a second path separate from the first path and with an armature winding in an intersection between the first path and second path in combination with the other features of claim 30. The prior art of record does not disclose or teach a system for moving a stage along a path with first, second and third path sections where there are means for magnetically directing the stage from the first path to one of the second or third paths via the means for intersecting the first path with at least second or third paths as recited in claim 34.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Murai et al. 5,014,625 discloses first, second and third paths with armature windings disposed therein as shown in figure 18 and as described in column 3 lines 33-44. However in column 5 lines 5-11 Murai teaches putting armature windings only in the straight portions of the path. In figure 18, armature windings are shown in the straight portions before and after the intersection, but not in the intersection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
